JOB DESCRIPTION: Noxilizer Microbiology Lab Technician

The Microbiology Lab Technician will perform testing and support functions required to support the core research and development program at Noxilizer. The Microbiology Lab Technician is required to perform routine tasks, make scientific observations, maintain detailed workbooks/documentation and ensure all documentation fulfills generally accepted professional/industry standards.

COMPANY:

Noxilizer, Inc. provides room temperature nitrogen dioxide sterilization technology that offers many benefits over traditional sterilization methods. Noxilizer sells sterilization equipment to pharmaceutical, biotech and medical device manufacturers and also offers contract sterilization services at its Baltimore, MD facilities. Noxilizer’s expert microbiology and material compatibility team is ready to partner to solve sterilization challenges through every phase of the process. Noxilizer, Inc., founded in 2004, is privately held with offices in the US, United Kingdom and Japan.

RESPONSIBILITIES:

- Prepare Microbiological growth media and other laboratory solutions to support microbiology laboratory testing.
- Maintain Noxilizer laboratory equipment and facilities.
- Perform testing to support microbiology R&D projects in accordance with SOPs and regulations (ISO, GLP).
- Make detailed observations, documents results and performs data analysis.
- Demonstrate a consistently high level of quality of work.
- Utilize problem solving/ trouble shooting skills.

REQUIREMENTS:

- BA/BS in Microbiology, Biology, a Life Science or a related discipline.

OTHER REQUIREMENTS:

- Excellent oral and written communication skills
- Ability to work well independently and in a team based environment
- May be required to work a schedule outside business hours and/or flexible shifts.
